 - Windows

SOBRE MÍ

Programmer and Musician, both professionally and by vocation. I developed my passion for programming as a student at 42 Madrid, considered one of the most innovative institutions in the world. There, I learned to face any challenge and emerge successfully.

Thanks to my musical training, I consider myself a well-rounded person who enjoys learning and discovering new challenges, always with discipline and a positive attitude in the face of adversity. Among other skills, I have developed the ability to perfect multitasking and pay attention to detail when organizing events, lectures, or concerts.

My professional experiences have led me to be part of innovative projects that require constant learning and adaptability in response to changes.

I also have excellent interpersonal skills, allowing me to create a pleasant and collaborative environment in any setting, with both coworkers and clients.
